

Look great, feel amazing Fresh, smooth, young-looking skin doesn't just look fabulous, it helps give you the confidence you crave. More and more people are choosing Botox® injection treatments as a simple, safe and affordable way to turn back time and enjoy not just gorgeous looking skin, but also the confidence and freedom that come with it.

### **The Background**

Botulinum toxin type A, or Botox®, has been used successfully in clinical applications for more than 30 years. Today, after millions of trouble-free treatments, it's the UK's number one choice for rejuvenating skin by reducing the inevitable effects of ageing in all areas of the face and neck. Botox® can also be used to treat excessive sweating ("hyperhidrosis") typically in the underarm area.

### **The Benefits**

Looking younger and healthier are the two main reasons for having a course of Botox® injections. Smooth, fresh, wrinkle-free skin doesn't just look fantastic, often it can give people the added self-confidence they need to feel good about themselves and get the most out of life.

As well as stunning end results and some fantastic psychological knock-on effects, there are good practical reasons for the popularity of Botox® injections.

**Safe** Clinically tested, officially approved by the FDA and administered by our skilled and experienced practitioner, Botox® injections are completely harmless. This treatment hasn't been known to cause long-term problems despite being used for more than 30 years.

**Versatile** As well as the face, forehead and around the eyes, Botox® injections can be used to improve the look and feel of skin around the neck, mouth and chin; and to combat excessive sweating.

**Quick** Although the full benefits become apparent a few days after treatment, the Botox® injections themselves take just a matter of minutes, so they're easy to fit into your busy schedule. Because there are no unpleasant or unsightly side effects, it's even fine to return to work immediately after a course of treatment.

The way Botox® works is simple. By blocking the transmission of nerves to the muscles under our skin, the effect of Botox® is to 'relax' the face and undo the lines and wrinkles that gradually build up as our natural collagen is worn away over the years.

One of the great things about this kind of treatment is that localised injections affect only the specific muscles targeted by the practitioner, meaning your natural and unique facial expressions aren't altered at all.

### **The Questions**

#### **Who is suitable for Botox® treatments?**

Almost everyone, providing they're not pregnant or breastfeeding. As part of our safety procedure we'll ask you to complete a medical questionnaire before treatment.

#### **Do Botox® injections hurt?**

We use very fine needles to inject Botox®, and although a slight redness might occur where the needle enters the skin, the treatment is generally painless.

#### **How long do the effects of Botox® last for?**

The visual effects of Botox® gradually disappear after around three or four months. At this stage a further course of treatment will rejuvenate the skin once again.

#### **Can Botox® be used with Hyaluronic Acid Dermal Fillers?**

Yes. There's no reason why the two treatments shouldn't sometimes be used together to achieve the best possible results.

**Botulinum** reduces Aging, Lines and Worries

#### Other Services

Our safe and simple Hyaluronic Acid Dermal Fillers treatments are the perfect complement to Botox® injections, helping knock years off your appearance and giving added fullness and definition to your skin. Please just ask for details.

Here at Belle Vue we pride ourselves on quality and professionalism because our clients have every right to expect them. We understand that when people put their trust in our team and our skills, it's only fair that we do everything we can to give them the smooth experience and fantastic results they deserve.

I'm passionate about all the treatments I perform here, and that's because I've seen first-hand the huge difference they can make to people's everyday lives. "I've been carrying out Advanced Botox® and Hyaluronic Acid Dermal Filler procedures since 2003, and I've made it my business to combine up-to-date theory with the very best clinical practice so that everyone I see enjoys the peace of mind that they couldn't be in safer hands.

If you've any questions or concerns not covered in this leaflet, please feel free to call our practice to book a consultation.

We look forward to meeting you soon.
